

Conducting Digital Forensics: Gathering and Preserving Electronic Evidence

Program Description

One of the key challenges in today's world for fraud examiners and investigators is the increase number of utilization of technology in workplace at any organization across the globe. Hence, the opportunities for fraudsters are widely opened, day in day out, more than what they have in the past.

Desktops, laptops, tablets, feature phones, smartphones, digital cameras, even watches and GPS devices are all possible sources to abet a fraud. On the flip side of a coin, they also all leave behind digital trails.

Therefore, this course is aimed to introduce attendees with the essential knowledge and skill setthey need when their investigation turns up electronic evidence starting from evidence collection, chain of custody, expert designation and analysis. In addition to that, the participants will understand what and how digital forensics examiners do their jobs and get the insights on how to effectively collaborate with them as part of their investigation activities.
