

COBIT

Description

Initially an acronym for Control Objectives for Information and Related Technologies, COBIT is a framework released by ISACA for information technology (IT) management and IT Governance domains intended to bridge the gap between control requirements, technical issues and business risks. To research, develop, publish and promote an authoritative, up-to-date, international set of generally accepted information technology control objectives for day-to-day use by business managers, IT professionals and assurance professionals are its main mission. Each of its process is defined together with process inputs and outputs, key process activities, process objectives, performance measures and an elementary maturity model.
