

Shutdown, Turn Around and Outages Maintenance Management

Shutdown, turn around or Outages Maintenance has typical characteristics, that's different from other type of maintenance. This type of maintenance requires huge resource, because the volume of work which has to be handled is quite huge too. The schedule is usualy very tight, where thousands of tasks should be done in just a few days.

STO Maintenance needs a very good Planning, Scheduling and Project Management approach. Because the volume of the work is quite huge, it is not uncommon to settle a seperate unit of maintenance to handle this type of maintenance.

Trainer: Ir. Rahmat Priyo Handono, MM
