

Understanding and Implementing TOGAF

Program Description

As the foremost generic framework in the field of Information Systems (IS) and Information Technology (IT) Architecture, TOGAF constitutes of crucial and major guidance on what to do to establish an architecture process and practice, how to leveragethem in conjunction with planning longer-term transformation of the enterprise and strategic architecture and designing further capabilities further to bring it forward.

In high-level perspective, it looks at the respective framework as a whole, which includes several techniques to assist in describing, organising, adopting and governing the architecture particularly whenever dealing with issues such asSecurity and Service-oriented Architecture.
